Automatic installation

You can install Kepler - Color fields | SLA & Custom actions for Jira through the Universal Plugin Manager (UPM). For information on how to use UPM, take a look [here](#).

1. Log into your Jira instance as an admin.
2. Click the admin dropdown and choose **Add-ons**. The *Manage add-ons* screen loads.
3. Click **Find new apps** or **Find new add-ons** from the left-hand side of the page.
4. Locate **Kepler - Color fields | SLA & Custom actions** via search. Results include app versions compatible with your Jira instance.
5. Click **Install** to download and install your app.
6. You're all set! Click **Close** in the *Installed and ready to go* dialog.

The screenshot displays the Jira UPM interface for the 'Kepler - Color fields | SLA & Custom actions' app. At the top, there is a search bar containing the app name and several filter buttons: 'Résultats de la r...', 'Toutes les catég...', and 'Tous payants et ...'. The app card features a logo on the left, the app name, and a star rating of 3 stars. Below the name, it lists 'Kepler Technologies' as the provider and 'Pris en charge par le fournisseur' as the status. The app is categorized under 'CUSTOM FIELDS' and 'JIRA SOFTWARE'. It has 45 installations and is free ('Gratuit'). A 'Gérer' button is located in the top right corner of the card. The main description states: 'Kepler - Color fields | SLA & Custom actions will allow you to : 1- Add one or more KPI (time to perform one or more process steps) 2- For each KPI, define the colored flag for elapsed time ranges'. Below this, there are three sections: 'Ensure SLA compliance' (highlighting SLA compliance with colorful indicators), 'Easy to configure' (specifying the shape and color of indicators), and 'Easy to schedule' (setting the refresh frequency). A 'Plus de détails' section provides a list of features: adding flags, defining colors and shapes, setting update frequencies, defining actions, and defining working days. A 'Captures d'écran' section shows a screenshot of the app's interface with a checkmark. On the right side, there are links for 'Assistance et tickets', 'Documentation', 'EULA', 'Sécurité et confidentialité des données', and 'Répertoire dans Marketplace'. At the bottom, there is a note: 'Feel free to contact us to get additional information or to schedule a demonstration.'

Manual Installation

If you have the app file (a file with the extension .jar),

1. Go to the **Administration** section of Jira and look for the Apps menu;
2. Select **Upload App** and upload the jar file.
