

Kepler - Merging Documents | Ms Office & Pdf

Overview

Kepler - Merging Documents combines all existing attachments in a given issue in one single PDF that will be created and uploaded when pressing an action while controlling page order

Kepler - Merging Documents is an app developed by [Kepler Technologies](#), an Atlassian Solution Partner, more information below.

Kepler - Merging Documents for Jira is an app that helps creating a single pdf document that combines and concatenates your attached files from a given Jira issue.

With Kepler - Merging Documents ,you are able to :

- Select (add/remove) the attachments you want for your output pdf,
- Re-order your selected attachments,
- Combine your attachments into one single pdf document that can be exported.

Kepler - Merging Documents is available for **Jira Server** versions in **English, French**.
